# GEARBOX AND PUMP REPAIR

THE MOST TRUSTED NAME IN PRECISION MACHINING

## The Anthony Advantage

With a culture of precision and service from the industry's best machinists, Anthony Machine aims to be our customers' favorite supplier in the quality machining of new and refurbished parts.

### Anthony Gearbox Repair Advantages:

- In-house know-how of breakdown of virtually any type of gearbox
- Service mindedness in timely evaluation, repair and reinstallation
- Reverse engineering capabilities to remanufacture parts when OEM parts are not available
- Value found in a full service repair and machine shop
- Industry's best machinists and leading Quality Assurance team

**Anthony Machine** has served the manufacturing industry since 1946. Our 50,000 square foot facility in San Antonio is dedicated to precision machining including equipment repairs and refurbishment

Our gearbox repair services cater to the oil & gas sector as well as the mining, aggregate, construction including heavy building materials, marine and transportation industries. Our services cover everything from re-engineering, including CAD design and modeling, to any required fabrication and machining.

## When Time Matters...

Having the right equipment and the know-how to repair industrial components has been a hallmark of Anthony Machine for close to 70 years. Our people have worked on virtually every type of industrial facility with a can-do, positive attitude. Between our skilled technicians and our advanced equipment capabilities, you can be sure that we will find and solve the problem quickly and efficiently – even if we need to work around the clock to resolve the problem.

**Gearbox Repair Project**

*Our operation is conducted under strict policies of ISO 9001:2008 certified Quality Management System.*

## The Anthony Gearbox Repair includes the following services:

- Cleaning exterior of gearbox and identification
- Disassembly for preliminary evaluation of the condition and repair required
- Customer communication of condition of the gearbox
- Estimation of parts replacement, reverse engineered parts and labor required for gearbox rebuild
- Failure analysis during complete disassembly and evaluation of the component wear and damage
- Cleaning all internal components and housing
- Rebuild worn out and damaged surfaces,
- Reverse engineer and manufacture new parts when OEM parts unavailable or lead time is not acceptable
- Assembly of the gearbox per OEM specification and engineering instructions assuring required fit of components and considering field application of the gearbox
- Inspection and labeling gearbox with job number for traceability
- 24/7 service when requested by customer

## Best-in-Class Quality Assurance Program

Anthony Machine maintains a stringent Quality Management System in order to meet the demanding needs of our customers' business. Combining 70 years of practical experience with the latest proven procedures, which are strictly adhered to for our new as well as our refurbished parts and equipment.

*We invite you to experience the Anthony Advantage and the difference it can make for your business*
