

Entry-Level Manufacturing or Mechanical Engineer (Precision Machine Shop)

We are seeking an enthusiastic and motivated individual to join our team in an entry-level position in a precision machine shop. In this role, you will have the opportunity to learn all aspects of the manufacturing process and play a critical role in ensuring the successful manufacturing of our products.

Responsibilities:

- Collaborate with design engineers to ensure manufacturability of new product designs, and make recommendations for design changes to improve manufacturability.
- Develop and implement manufacturing processes, procedures, and work instructions to ensure efficient and effective production of high-quality products.
- Troubleshoot manufacturing issues and work with the team to develop solutions to improve processes and minimize downtime.
- Continuously learn and stay up-to-date with new technologies, processes, and industry best practices.
- Work closely with the machine shop team to learn all aspects of manufacturing operations, including but not limited to, procurement, CNC programming, tool selection, machine setup, and quality control.

Qualifications:

- Bachelor's degree in Manufacturing or Mechanical Engineering or related field is a plus.
- Strong problem-solving skills with the ability to work well under pressure.
- Excellent communication skills, both written and verbal.
- Ability to work collaboratively in a team environment.
- Willingness to learn and take on new challenges.
- Familiarity with CAD software and CNC programming is a plus.

This is a full-time position with competitive salary and benefits. If you are interested in this exciting opportunity to learn all aspects of the machine shop and kickstart your career in manufacturing engineering, please submit your resume and cover letter for consideration.

Spanish speaking candidates are encouraged to apply.
